DETAILED ACTION

Claim Rejections - 35 USC § 102

I. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

A. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by McMillen, US No. 5,897,119 ("McMillen").

i. In short, Mcmillen discloses a seal comprising a flexible resilient loop (Fig. 3).

The loop comprises a flexible, resilient sealing lobe (36) extending around the loop.

The sealing lobe has a deformable sealing surface (Fig. 4).

ii. There is a first channel (adjacent 38) extending around the loop and positioned opposite to the sealing lobe (36). The first channel facing in the axial direction away from the sealing lobe (Fig. 3).

iii. There is a second channel (retaining 50) extending around the loop and positioned contiguous to the sealing lobe (36). The second channel facing inwardly of the loop (Fig. 4).

iv. The loop has a substantially circular shape (Fig. 4).

v. There is a reinforcing band (50) positioned substantially within one of the first and second channels.

vi. Examiner's Note: The claims are being examined as they pertain to the subcombination of a seal comprising a loop.

Allowable Subject Matter

- II. Claims 24-42 are allowed.

Response to Arguments

- III. Applicant's arguments with respect to claims 1-42 have been considered but are moot in view of the new ground(s) of rejection.
